WARNING — To Party Line Users

Michigan State law (Number 56 of Public Acts of 1952) makes punishable offenses of certain acts in connection with the use of party line telephone service. The law in part, reads as follows:

"Any person who shall willfully refuse to yield or surrender the use of a party line to another person for the purpose of permitting such other person to report a fire or summon police, medical, or other aid in case of emergency, shall be deemed guilty of a misdemeanor.

Any person who shall ask for or request the use of a party line on pretext that an emergency exists, knowing that no emergency in fact exists, shall be deemed guilty of a misdemeanor.

'Emergency' as used in this section means any situation in which property or human life are in jeopardy and prompt summoning of aid is essential."

USEFUL TELEPHONE INFORMATION

"PARTY LINE COURTESY" PAYS

Since telephone equipment is scarce, many of our customers are using party-line service temporarily.

The best party-line service for all depends on courteous use of the line.

If you're a party-line user, you can do your part. Listen a moment to make sure the line is clear before you call—try not to interrupt your neighbor's conversation. Hang up quietly if the line is in use. Keep your conversations short so others can use the line, too.

USE THIS DIRECTORY FIRST

Many calls to "Information" are unnecessary since they are for numbers which are listed in this directory. Every operator and all telephone facilities are needed to handle today's huge volume of calls.

So please don't ask our Information operators to look up numbers unless you are sure they are not listed in this directory. You can get your call through faster by referring to this directory and calling by number.

Your cooperation is appreciated.

APPLICATIONS

Applications for original establishment of service must be made on the Telephone Company's standard application forms. Requests from subscribers for additional service, equipment, etc., may be made orally or in writing, and upon approval, or installation of the service, become a part of the original application. An applicant for service must pay all previous indebtedness to the Company for telephone service before service will be furnished.

OWNERSHIP AND USE OF THE EQUIPMENT

Equipment, instruments and lines on subscriber's premises, furnished by the Telephone Company, shall be and remain the property of the Telephone Company, whose agents and employees have the right to enter said premises at any reasonable hour for the purpose of installing, inspecting, or repairing the instruments and lines or for the purpose of making collections from coin boxes and, upon termination of the service, for the purpose of removing such instruments and lines. Such equipment is not to be used for performing any part of the work of transmitting, delivering or collecting any telephone message where any toll or consideration has been or is to be paid any party other than the Telephone Company, without the written consent of the Telephone Company.

Subscribers must not use or permit to be used any electrical or mechanical apparatus or device in connection with the equipment or facilities furnished by the Telephone Company without the written consent of the Telephone Company, or permit the attachment of any advertising devices, except upon the approval of the Telephone Company. In case any instrument, apparatus, or device of any kind other than that furnished or approved by the Telephone Company is attached to or connected with any part of the Telephone Company's property, the Telephone Company shall have the right to remove such instruments, apparatus, or devices or to suspend the service so long as such instruments, apparatus, or devices are so attached or connected, or to terminate the service.

TELEPHONE NUMBERS

The subscriber has no property right in the telephone number or any right to continuance of service through any particular central office. The Telephone Company may change the telephone number or the central office designation, or both, of a subscriber whenever it deems it desirable in the conduct of its business so to do.

TELEPHONE DIRECTORIES

Directories regularly furnished to subscribers are the property of the Telephone Company, are loaned to subscribers only as an aid to the use of the telephone service, and are to be returned to the Telephone Company upon request or when new directories are issued. The Telephone Company shall have the right to make a charge for directories issued in replacement of directories lost, destroyed, defaced, or mutilated while in possession of subscriber.

No liability arising from errors or omissions in the making up or printing of its directories shall attach to the Company except in the case of charge listings, in connection with which its liability shall be limited to a refund at the monthly rate for each listing for the time an error or omission continues after reasonable notice in writing to the Company.

USE OF SERVICE

Subscriber telephone service is furnished only for use by the subscriber, his family, employees, or business associates, or persons residing in the subscriber's household, except as the use of the service may be extended to joint users or to persons temporarily subleasing a subscriber's residential premises. The Telephone Company has the right to refuse to install subscriber service or to permit such service to remain on premises of a public or semi-public character when the instrument is so located that the public in general or patrons of the subscriber may make use of the service.

PAYMENT FOR SERVICE

The subscriber is required to pay, in accordance with the Telephone Company's established tariffs, collection and billing practices, all charges for exchange service and equipment, and for all toll messages or service rendered to his station, including all toll messages on which the charges have been reversed and accepted by any party at his station. All bills are due when rendered and are payable at Telephone Company's business offices.

In the event that any sum due (except as provided below) is not paid on or before the 20th day after the issuance of the bill, a written notice may be sent to the subscriber, calling attention to the fact that the amount is due; and, if payment is not made within five days thereafter, the Company may deny service without further notice.

When the service of a subscriber has been denied in accordance with the preceding paragraphs, but the service has not been terminated or the order to remove the service has not been completed, if such service is restored, a Restoral of Service Charge of \$1.50 will be made. In case service has been denied, in addition to the restoral of service charge, the subscriber will be required to pay service charges up to the time of restoral of service. Subsequent to the completion of an order to terminate the service, it will be reestablished on the basis of a new service application.

Classified Telephone Directory

The Classified Telephone Directory is published for the benefit and convenience of our subscribers. Each business subscriber is given one listing under one general classification without cost. Additional listings under other classifications may be obtained for a nominal charge by making written application, therefor, to the Company in advance. For Company accounting reasons only, such additional listings are identified in this section by an (*) shown at the left of the extra listing telephone number.

The telephone company and the publishers of this directory assume no liability whatever for damages arising from errors or omissions in making up or printing this book. The utmost care is used, however, in listing all subscribers correctly.

All subscribers (both residence and business) are listed alphabetically on the preceding white pages. The following pages (yellow) list only those who pay a business rate.

Need a mailing service? The easiest way to solve a "sticky" problem is to look in the Classified Section of the Telephone Directory. Whatever or whomever you need—antiques, buttons, carpenters, or dentist, they're all conveniently listed with name, address, telephone number. Make it a habit to look in the Yellow Pages.

HOW TO USE THE DIAL TELEPHONE

First of all, obtain the correct number from the latest directory which has been distributed by the telephone company. Telephone numbers are constantly being changed, and, in fact, an old, familiar number which you may have been calling for years might no longer exist.

Next, remove the receiver with care. "Jiggling" the hook could conceivably give you a wrong number.

Then Listen for the Dial Tone!!

No other instruction is more important than this, because, unless you hear the steady, humming sound in your receiver before you begin to dial the number, your telephone is not connected with the central office equipment, and you will be unable to contact anyone. The dial tone is the "Number Please" of dial equipment.

If you do not hear the dial tone, replace your receiver for several seconds. Then listen again for the tone.

After you hear the dial tone, you may begin the dialing operations immediately without replacing the receiver.

How to Dial a Number:

Suppose, for example, you wish to call the number OS 3-9000. First, place your finger in the dial opening which is directly above the letter O. Turn the dial clockwise with your finger until you touch the finger stop. Then remove your finger and allow the dial to return to its normal position. Follow the same procedure for the letter S then for the 3 and the rest of the digits in the number.

When you have finished dialing the complete number, you should hear either the ringing signal or the busy signal within a few seconds. The ringing signal is a low, intermittent, purring sound, whereas the busy signal is a higher-pitched "buzz-buzz-buzz."

If you hear neither the ringing signal or the busy signal, it's quite possible that you have made a mistake in dialing. Replace your receiver, listen again for the dial tone, and repeat the dialing procedure.

If you make a mistake while dialing, replace your receiver immediately and wait for the equipment to "erase" your mistake before listening for the dial tone again. Your error can not be corrected unless you replace your receiver for a few seconds.

Mich.

Party line subscribers and extension users: If you call from a party line or any line having an extension telephone, listen first, before dialing, to see if the line is in use. If you do not hear a ringing signal OR the dial tone, ask if the line is being used.

If you hear dialing "clicks" when you lift the receiver, they indicate that you have interrupted someone else's dialing. It is common courtesy to remain on the line until the other party has finished dialing in order to inform him that it will be necessary for him to redial his number. Then hang up and permit him to dial again.

Calls To A Party On Your Line

If you dial a number and repeatedly receive a busy signal it is possible that the party you are calling is on your line.

Calls to another party on your line may be made by dialing a special code. A Card has been prepared for your directory, listing the parties on your line and the special code you must dial to get them. You may also secure a code number by dialing information and asking for the code number.

When you know the special code for dialing another party on your line dial it in the usual manner, then hang up your receiver. Your bell will ring at intervals; when ringing stops, it is an indication that the called party has answered. Remove the receiver and start conversation. If the ringing does not stop within about one minute, it is probable the called party is not available. To stop the ringing, remove the receiver and then replace it.

If you receive a call from someone on your line, you will hear a clicking, this tells you to wait until the person calling you answers.

When you have finished your conversation, be sure to replace your receiver carefully. If your receiver remains off the hook, your line is automatically "busy" to anyone who tries to call you.

If you are making a series of calls, you must "hang up" between each call. Otherwise, you will not hear the dial tone which informs you that the line is ready to accept another call.

Please limit the length of your calls. Excessive "hold time" helps to tie-up and jam the dial equipment which prevents the use of the service by your neighbors. Particularly if you are on a party line, be sure that you limit your local calls, as often as possible, to five minutes or less.

TALK NATURALLY

Normal tone of voice is best on telephone. Whispered words are faint. Shouting distorts the message. It may make it gruff and unpleasant.

A vital factor in the highly specialized work of providing dependable, low cost telephone service is that telephone supervisors—foremen, wire chiefs, chief operators, managers—start at the bottom. Every part of your service is managed by men and women whose judgment and decisions are based on experience with the job.

Distance, once a barrier to spoken words, has lost its power to limit the human voice. Today words defy intervening miles, and two friends with an ocean or continent between them talk as if face to face. In thus extending the range of man's voice, the telephone performs a modern miracle. It is part of the miracle that this is done so swiftly, so easily and so cheaply.
