MONTCALM COUNTY

SOME FACTS AND FIGURES

MONTCALM COUNTY, with a total of 4,678 farms in an area of 724 square miles, is distinctly a farm county. More than 84 per cent. of the entire area of the county is in its farms, and more than 67 per cent. is under cultivation. The farms are, as a rule, of more than average size, about 2 per cent. being under ten acres. They are almost, without exception, profitable and correspondingly valuable. The farmers, as a class, are the most prosperous folks in the county. In view of the number of farms, that is in itself a statement of the wealth of this section.

The farm population of Montcalm County is almost exclusively native-born white.

It is interesting to note the number of farms in the county operated by their owners. Of this class there are 4,061, or 86 per cent. One thousand eight hundred and twenty-three, or 44 per cent., of them are reported free of mortgage debt. This is an exceptionally large percentage. Of the balance, the remarkably low mortgage indebtedness of only 29 per cent. of the entire valuation is carried. Even in the absence of

other statistical figures, these mortgage statements alone would indicate exceptional prosperity about Montcalm County farmers.

The largest single crop, and the one produced most generally throughout the entire county is potatoes, of which 2,228,416 bushels were produced in 1910, a notably bad crop year, but the latest for which authoritative figures are available. Following closely on this for quantity is corn, with a total of 912,594 bushels; oats comes next, with 598,632 bushels, and wheat fourth, with 232,837 bushels. The combined total of value of these four crops was in excess of two million dollars.

Everywhere is an atmosphere of hard work. Everyone takes work seriously and as a matter of course. There is no false pride about it, and no failure to realize its importance and its necessity. Rich farmers' wives, and sons and daughters take pride in their fine butter, their eggs, their vegetables, their chickens and their stock. The relations between the people of the farms and the people of the county seat are most cordial. The farmers deposit their savings in the local banks, and deal in the local stores.

This directory is published in the belief that it will serve to acquaint the residents of one end of the county with those of the other. We believe it to be accurate. We realize, however, that even in the most carefully compiled and printed books certain errors are bound to appear, and we apologize in advance for any such that may be found by our subscribers.

"Seeds of Quality"

THERE is no economy in sowing the lower grades of seeds even if you can buy them at half price. Pure high-grade seed of strong vitality is always the cheapest in the end. All seeds grown and handled by us are carefully tested as to purity and germination before sent out and we know they will grow and give the best of satisfaction. Having had over thirty years' experience in growing seeds combined with the latest and most improved methods of handling them, we do not hesitate to say that we can serve you quite as well as anyone in the seed trade. Farmers in Western Michigan have no need to send away for their seeds as we can supply the best that grow.
